

Stacked bar chart showing the distribution of vegetation types across five regions: Greenland, McMurdo_Dry_Valleys, Queen_Maud_Land, Svalbard, and Vostok. The y-axis represents the percentage of the area, ranging from 0 to 100. The x-axis lists the regions. The legend identifies eight vegetation types: Dry grassland (dark grey), Low shrub (pink), High shrub (magenta), Tundra (light purple), Lichen (cyan), Moss (green), Bare ground (orange), and Ice/snow (red).

Region	Dry grassland	Low shrub	High shrub	Tundra	Lichen	Moss	Bare ground	Ice/snow
Greenland	10	5	45	10	5	15	15	5
McMurdo_Dry_Valleys	5	2	40	10	2	5	35	5
Queen_Maud_Land	15	20	25	5	0	20	20	15
Svalbard	10	5	55	15	2	5	10	5
Vostok	5	2	40	10	2	5	25	10
